

ELECTION DAYS

and Every Canadian Woman May Vote

She is no longer merely the "power behind the man"; she now has a double power. Her old influence is just as strong as ever, and in addition women have now just as many votes as men, and often use them with much greater discrimination. Our country is better, stronger, safer because the heart and soul of Canadian womanhood now controls half the votes of the nation.

The Women of Red Deer

and district have apparently elected this store for continuous service. We trust that we have earned this privilege by good service in the past years. By watchful care in gathering none but the right merchandise; by never failing shrewdness in securing right prices; by constant thoughtfulness in maintaining courteous and intelligent service; by keeping the store interesting and by being continuously helpful and efficient about our work for the good people whom we serve.

Our store was never better than it is just now. Come and see the new merchandise whether you have purchases to make or not.

Women's Winter Coats

If you have in mind a cote—and you probably have—that will serve you admirably on all occasions, we invite you to inspect the moderately priced groups at this store. The season's smartest shades, styles and fabrics are shown, and some are becomingly trimmed with such furs as beaver, opossum, natural or dyed beaverine.

Street Frocks of Serges and Tricotines

Coat effects, or straight-line modes; full-length or elbow sleeve designs; trimmed with brilliant contrasts of color or in subdued tones—every variety of dress suitable for matron or miss will be found in the attractively priced groups at this store. Every frock shown is attractive, smart and strikingly individual.

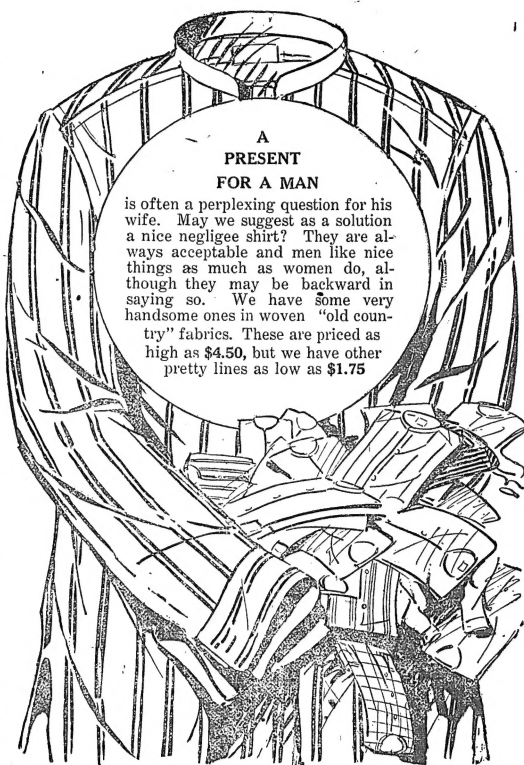

PANTS FOR MEN AND BOYS

Every pair in our store is offered at a marked-down price. You must wear them—buy them here.

MACKINAW COATS

for big men or little men; for men from 8 years to 80 years. Nice, cozy, warm coats, and as good looking as they are comfortable.

A PRESENT FOR A MAN

is often a perplexing question for his wife. May we suggest as a solution a nice negligee shirt? They are always acceptable and men like nice things as much as women do, although they may be backward in saying so. We have some very handsome ones in woven "old country" fabrics. These are priced as high as \$4.50, but we have other pretty lines as low as \$1.75.

Winter Weight Underwear For Women

In Cotton, Wool, Silk and Wool, and Cotton and Wool mixtures; a wider variety of styles than are ordinarily featured in knit underwear will be noted by women who choose from our new selection.

VESTS with high, low or "V" necks, long or short sleeves, or straps.

COMBINATIONS of all wool, silk and wool or cotton and wool mixtures, in all wanted styles.

BLOOMERS with elastic at waist and knee, in pink and white.

DRAWERS in open or closed styles; long or tight knee.

Millinery Clearance

All our Millinery is On Sale now at a discount of 33 1/3 %. It's a great saving and many are availing themselves of it. We hope you will join the number.

School Gloves for Kiddies

Nice Little Jersey Gloves either in Blue or Tan for little girls to wear to school. They only cost 25¢ per pair and are neat and serviceable.

Let us remind you that there is a Boot Sale on at our store, an dthere are values up to \$12.50 going at \$5.00. There are Sweaters selling as low as \$2.50; others at \$5.95, \$7.95 and \$9.00, that were formerly priced from \$9.75 to \$15.00.

à la Grâce
Corsets

An INDEFINABLE AIR of ELEGANCE and CHARM

Is attained by the woman who wears

THAT is because her foundation lines are correct. C/C à la Grâce Corsets bring out the natural beauties of the figure, and softly subdue any little irregularities.

They are made of reliable and pretty yet durable material, and give the greatest comfort and wear.

To be pleased or not to be pleased?

—That is the question.

If you buy your next suit with our label on it, you are sure to be pleased and get good value for your money.

Facsimile of Label

Fashion-Craft Quality Clothes are a branded line guaranteed by the makers to give service and satisfaction.

Sold by 300 merchants in Canada.

BRUMPTON & GAETZ, Limited

A black and white photograph of a person standing on a grassy bank, looking across a body of water towards a dense forest. The person is wearing a hat and a long coat, and is holding a long staff or pole. The scene is framed by trees on the left and right.

vined that Atlas had a feather-weight burden compared with mine. Exhausted but triumphant, I lowered my head toward the floor and cried:

"See the gorgeous specimen I have found!"

"What yer going to do with it?" asked my boss, lookewarily.

"I'll give it to the Geological Museum at Ottawa," said I. "They are crazy to have things like this." I held up the small section of the soil with the tabac Canadian before remarking:

"I'll give it to them when they fella down there want with that ole truck!"

"I knowed what you was going after," he said, "but I thought you was after all them miles. I got two of them heads in my barn."

"Two?" I asked, incredulous.

"Two?" he asked, incredulous. "Two?"

"Why, the district must be a regular tobacco repository, equal to the Red River country."

"Sure!" I'm tellin' you," protested my boss. "Keep yer feet on, as you might say; hours and teeth, perhaps, too. Better'n your kill."

"Better'n your kill? Are they?" I faltered.

"Steers heads," he returned, smiling. "You can kill a couple every fall. You can have your pick of 'em for that there Zoo-mengengerie at Ottawa, and welcome."

—Mader Macchett

Hogs—After conference in Ottawa this week it was announced that on May 1, 1922, hogs will be graded by standards, work to be done at public yards and abattoirs by government graders; packers are to be asked to agree to a premium of 10 cents per hundred on bacon type hogs; six months' notice to be given on change in spreads.

Calgary market was very quiet, with practically no sales until today, when (best) light \$9.50.

Edmonton market has dropped a little from last week, and hides Thursday were \$9.25, though some sold earlier in the week at \$9.40.

Sheep—Lower—Calgary markets lower on lamba, \$5.00 to \$7.15; wethers, \$4.50 to \$5; ewes, \$2.50 to \$4.25, and some breeding ewes down to \$1 each.

Sheep—Steady—No changes in prices reported at Edmonton, with lambs \$5.50 to \$7; ewes, \$3.50 to \$4; wethers, \$4.50 to \$5.50.

Grain—

Very weak—Disastrous reductions in all grain during the week, and prospects for immediate revival not encouraging. At recent low prices some export business is being done, but unlikely to develop much while present decline is under way.

Eggs—Very light receipts and prices low. Fresh all-day eggs—Market \$12.00; cream butter—Market firm, with light make; cartons whole, selling at 35c to 40c; not much surplus. Creamery eggs—Cartons whole, steady—With grades 30c; cream and milk—prices unchanged. Eggs—All day prices lower; chickens 13c to 15c; fowls, 10c to 12c; geese, 13c to 14c; ducks, 14c to 15c; turkeys, 20c to 25c. Poultry—Prices slow at \$20 delivered.

Poultry—Prices dropped a bit at Boston market, with heavy receipts and sales. Turkeys, 20c; chickens, 13c to 15c; fowls, 7c to 7c; turkeys, 20c; ducks and geese, 13c. Creamery butter—Carlots, 18c; basis average, 19c. Receipts odd lots going to the coast. Dairies quiet.

Butter—Slow and unchanged. Creamery butter still strong, but no change yet, but production falling off badly.

Eggs—Advanced 50c, now 95.50; premium will be paid for strictly fresh. No word of present receipts from the West. Hay—

Lower—Dealers say no business developing; prices down country buying basis; upland, \$12 to \$14; timothy, \$1 to \$1.8; green feed, \$10 to \$12.

Hides—
Unchanged—Some packer hides selling in Chicago, but not any business opening for western branded hides yet.

Wool—

Quiet—No change in quiet eastern market.

J. W. DURNO - - - AUCTIONEER

(By Frederick Niven)

The name had always inviolated its sanctity. It went into the same place as the names of the great cities of the world—London, Lands, Land of Little Sticks. Where the excellent goodness of God made it (me) I was not to be disturbed on a late July evening, actually close enough to have Nixon, the long leg, the long arm, the long nose, the long dick, if not the range of the hanging glaciers, the direction of our dreams, at any moment it seemed as if the light of the moon would not so—that the light of the moon would behind me (we sat on the veranda of the hotel, the moon (start) was not really straining on a pad of paper on Nixon's knee, the moon was not really in shadow, save the chin, under a big cup-puncher hat; that was only the moon, the moon, the moon, the moon; that only in a dream was I saying to me: "And what do you folks think of this?")

And in the way of fruit, do you prefer pears or apricots or peaches? All right, I said, I said, I said, I was going, even though I laid out my knaki pants and leggings and a new coat before myself, and that night.

Very early I was awakened, to the restlessness of the camp. The ceiling of the tent above my bed, by the light of the moon, was indubitably there where the loon calls; and I counted the minutes of the hours of the day in the pine-ness. The call of the loon; the scent of sage-brush and of balsam poplar; the hoarse cry of the horses whose tails are not docked; the wind-winked lakes dropt among the luxuriant Selkirk or the austere Kootenai; the rippling of the water polished jade (to flitch a simile from a little sheaf of songs I came across in the *Chinaman's Almanac*, "Calendar"), and still blue lake where the ripples from a canoe give to the surface the appearance of a blue sky, and the loon's cry, and the smoke. Enough said. I was a trifle excited as we started out from the camp, in an automobile, on the wagon-road to the place where Nixon and the horses were to await us. June bugs and yellow grass hoppers were in the air, and the wind on the flies dated past. Once the wind held upon the wind-screen till it took the horses and the horses took off. We left behind us a pennon

Reflections in the Lake of the Hanging Glaciers.

dust, bobbing away from the hot where people said: "Where are the going?" and somebody replied, "The Lake of the Hanging Glaciers." In a meadow beside a bend of Horse Thief Creek, where were three log cabins, the horses waited for us. We came round a twist of the road brushing cottonwood and poplar willow branches and, stopping, heard the tinkle of a horse bell; and there they were, Nixon, with his fore against a pack hauling on a rope in the act of completing the work known as "throwing the diamond hitch."

Trade of America with Canada Is
Waving a Red Flag, Says New York
Herald.

New York, November 1.—The trade of the United States with Canada "right now is waving a red flag," declared the New York Herald in an editorial discussing the fact that the

value of United States exports to Canada is decreasing much more rapidly than that of United States imports from the Dominion.

The Herald suggests in this connection, the advisability of extending larger credits to Canada.

"Canadian values are not very apart from our own," the paper says. "If, therefore, we lose two dollars' sales to Canada for every dollar sales that Canada loses to us, we are moving decidedly in the wrong direction."

The paper declares that this is what the United States has been doing, quoting figures to show that for every dollar that Canada's exports to the United States have gone down

In the last year, United States exports to Canada have gone down \$2.25.

"And Canada, let us not forget, has been the world's largest buyer of American goods in the whole world," states The Herald. "With our Canadian exports of approximately a million dollars a year, only the United Kingdom surpasses Canada in volume and value of exports to the whole of South America, Mexico, Central America, and the West Indies thrown in. did not see Canada as a buyer in the market of the United States. Now the relationship is heavily against us."

Distinguishing people remedied The Herald declares: "We have placed loans all over other countries but never can be normal customers of ours, while we have been stingy in credits to the one country destined naturally to be our very best customer."

To All Whom It May Concern:

Please take notice that H. Milt Martyn, Commissioner under authority vested in the Lieutenant Governor in Council by Chapter 22, Statutes of Alberta, 1919, and Amendments thereto, will hold a Commissioner's sitting at the City Hall, Red Deer, at 10 o'clock in the forenoon of the 10th day of November, 1921, at which time will be considered the application of the City of Red Deer, made to the said Commissioner, for the cancellation of the other matters covered by the application are the securing by the said City of Red Deer, of titles to the land mentioned properties, and the cancellation of the plans thereof.

that cause, all the way I found hard to believe. The impression persisted that I might awake from sleep and an exquisite dream, that I would come to hear the sound of street sweepers, honk of late (or very early) taxis, and that Nixon's space-puncher hat showing ahead of me, I would see a small crowd of people. To begin with there were bridges over creeks we had to cross, cross, cross, but when we were on the other side of the creek and the horses drank before fording; and all the charming pictures that had been created by the photographer, the term, that of horses drinking by riverside is one of the finest.

That is only one of the simple lights of going to the Hangchow River. It may be that I have any improvement committed to the bridge of time there. There are a number of fords, and a number of very little little crack bridges, and every precipice shored up, every

BRAZIER'S

ROCKY MOUNT'N HOUSE

November 2, 1921.
The next real big time is at John Rodda's on the 4th inst.

Mrs. L. Hamblin and Miss Hamblin returned from a visit to the Coast last week.

Bert Stroh, the enterprising owner and manager of the Pastime Theatre, has lately added a large stage with wings and curtain, which now makes an ideal building for concerts, dances, etc., as well as moving pictures.

Those who attended the masquerade in the Pastime Theatre on Halloween night had a most enjoyable time.

Bert Vanduzee is returning this week to his work at Big Valley.

Mrs. Baldeish came out on Monday evening's train from Red Deer to keep house for her son Thomas, this winter.

Ed. Rutka, of Lamont, was a business visitor here on Monday and Tuesday.

The new barber in Gray's pool room is finding business brisk. He is adding another chair and employing an assistant.

The show put on by local artists in the Pastime Theatre last Wednesday evening was very good indeed, many thought it better than most of the travelling troupes.

Many hunters are already on the grounds west of here for a try at moose, which are reported to be very thick this year, and now that the big game season is open we can expect yarns bigger than fish stories, also the usual accidents.

One of our local sportsmen predicts

an open winter. He says everything points to one, even old brain hasn't denied yet, as he met him yesterday roaming the woods.

The Agricultural Society are holding a meeting to-morrow to wind up the year's business.

John Wilson, Jr., has taken up a homestead in the Prairie Creek country, south of the village.

Smith Bros., of Dovercourt, have opened an up-to-date butcher shop on the east side of Centre Street.

Mr. and Mrs. Harry Hoyte have erected and moved into a fine new residence on First Avenue.

ALBERTA NATURAL HISTORY SOCIETY

The regular monthly meeting of the Alberta Natural History Society was held on Friday, October 28, with President C. H. Snell in the chair.

Correspondence included a letter from Mr. Wm. Rowan, Professor of Zoology in the University of Alberta, accepting the Society's invitation to address them at the annual meeting.

Mr. M. J. Gibson, Clearview, wrote on behalf of the School Pairs Association, giving the names of winners of the Society's prizes at the school pairs.

Mr. W. F. Harris was appointed auditor.

The remainder of the meeting was devoted to detail arrangements for the Society's annual meeting, which will be held on the afternoon and evening

of Wednesday, November 23. Arrangements are being made for a lecture in the City Hall by Professor Rowan, probably with lantern slides.

Mr. W. F. Harris' paper on "Myths, Superstitions, and Popular Fancies on Natural History Subjects," will be given at the December meeting.

THE LATE LADY LAURIE

Ottawa, November 1.—Lady Laurier, widow of the late Sir Wilfrid Laurier, died at her home here at 11:45 o'clock this morning. All through the night the doctors attending Lady Laurier had expressed the fear that the end was at hand. Lady Laurier was in her eightieth year and caught a chill while out walking recently. No children survive. Sir Wilfrid died February 17, 1919.

The funeral will take place Friday morning in Ottawa to Notre Dame cemetery.

The late Lady Laurier, who before marriage in 1888 was Miss Zoe Lafontaine of Montreal, was very well-known and highly respected in Ottawa, where she had resided almost continually for the last 25 years. She was not a public woman, in the generally accepted term, but always had taken a great interest in the work of her late distinguished husband and the party which he led during his lifetime.

Occasionally Lady Laurier made a public address, and she frequently participated in functions which were held in Ottawa, but her work for the most part was done quietly and unostentatiously. On the occasion of the arrival at Ottawa of the new Governor-General, Lord Byng of Viny, Lady Laurier attended the reception on Parliament hill and was the first Ottawa lady with whom Lady Byng shook hands on arrival at the platform which had been erected. Since then she also had attended one or two gatherings of women in connection with the Liberal election campaign.

On many occasions during the latter years of his life, Sir Wilfrid had paid glowing tributes to Lady Laurier, who had been a lifelong helpmate to him. Their marriage, he frequently said, had been an ideal one, the only regret being in the fact that they had no children, for both he and Lady Laurier were very fond of children, and having none of their own they gave many parties for the children of others.

For several years Lady Laurier was president of St. Joseph's Orphanage and also was honorary president of the alumni of two Ottawa convents. She was also patroness of Ottawa Women's Canadian Historical Society; honorary president of the Local Council of Women, and at one time also of the Women's Canadian Club; patroness of the Catholic Women's League; the Federation des Femmes Canadiennes Francaises and the Friends of the Poor Society. Lady Laurier also took a great interest in the absolute committee of the Liberal association and attended its meetings here recently.

MR. SPEAKMAN IN THE LACOMBE WEST DISTRICT

To the Editor of the Advocate:
Dear Sir:—I am sending you a somewhat concrete summary of the opening meetings of the campaign.

The stillness in the country generally, and particularly in the rural districts, is bewildering. The electorate are simply waiting for the opportunity which will be given them on December 6 to record a collective determination to assist in the stamping out, in an orderly way, the present recognized system of representative government which has proven absolutely inadequate.

The work of organization is going on with an objective of 100 per cent.

Our first meeting was held Wednesday, October 19, in the Aspinall schoolhouse on the bank of the historic Blindman river. We were well received by a full house and the chief speaker, Mr. Speakman, dwelt most effectively with the tariff, transportation, marketing, and taxation, and very clearly demonstrated beyond any shadow of doubt, that a continuation of the present system of government and general administrative policy would result in nothing short of complete disaster to the basic industry of this country which is agriculture, and that Canadian industry dependent upon agriculture would inevitably crumble.

On Thursday evening, the 26th, he spoke to a very intelligent and sympathetic gathering in the Glibby U.F.A. hall and a number who were somewhat in doubt as to the effectiveness of economic group organization, declared their unreserved loyalty and support to the U.F.A. candidate during the campaign, and would vote solidly on December 6.

On Friday night the Bingley local met in the Bingley schoolhouse and gave Mr. Speakman a very cordial reception. A snow storm prohibited some from attending, but the spirit of the meeting was excellent, and unanimous support was promised to the U.F.A. candidate. The settlers in this somewhat remote district have given our present economic situation very careful thought, and are sanely and persistently proceeding to organize themselves against the present unjust method of government.

On Saturday night the Williams hall at Bonny was filled with townspeople and members of the U.F.A. and U.F.W.A. locals, and a deep interest was shown by all in the same and logical manner in which Mr. Speakman dealt with the current questions so vital to our Canadian private and national life. The discussion and arguments were basic, consequently unsatisfiable, and the speaker in reply to questions regarding transportation, taxation and the recent demonstrated bias of the federal government in justice in the movement initiated by the farmers. A closer union between the country and town continues, and

loyal support was accorded the U.F.A. candidate in a personal way.

At all these meetings it was noteworthy that the convention of the Red Deer federal riding had proceeded in the fundamental way of selecting a candidate to represent the varied interests of this constituency, viz., "Let him that is greatest among you be servant of all," and there can be no question as to the result on December 6.

A. C. JOHNSTON,
Director Lacombe Riding.

AN ARMISTICE DAY ENTERTAINMENT

A two-act comedy—a scream from start to finish—will be staged by the Veterans Concert company at the Armouries on November 11, 15 and 17, under the management of Capt. D. L. Hadden.

The comedy is entitled "Homeless Spinks" and is a particularly entertaining and amusing one and will be well handled by the company. The cast of characters is as follows:

Hotel Proprietor Chester Fulton
Dr. Brown Capt. Hadden
Nurse Holland Jack Marshall
Patience Jones Howard Malcolm
Insurance Agent Bill Day
Mrs. Speakman, hotel guest Walter Eggen

Cuthbert Rowe
The first night of the play falls on Armistice Day, November 11, and it is hoped that all the citizens will attend and encourage the boys in their efforts—and meet the Veterans on this anniversary date.

Major Lister, and officers, N.C.O.'s and men of the 7th Battalion excelled themselves in the arrangements for the Halloween Ball. It was an unqualified success. Everybody seemed bent on having a good time, and the whole atmosphere seemed permeated with the spirit of Halloween. No expense was spared, and the Capitol Orchestra provided excellent music, as shown by the host of encores. As usual the refreshments served by the Ladies' Auxiliary of the G.W.V.A. were delicious. The Battery are to be congratulated on the success of their first large social gathering.

On Saturday night the Williams hall at Bonny was filled with townspeople and members of the U.F.A. and U.F.W.A. locals, and a deep interest was shown by all in the same and logical manner in which Mr. Speakman dealt with the current questions so vital to our Canadian private and national life. The discussion and arguments were basic, consequently unsatisfiable, and the speaker in reply to questions regarding transportation, taxation and the recent demonstrated bias of the federal government in justice in the movement initiated by the farmers. A closer union between the country and town continues, and

TOYS

Our first display of the season is being made this week in the south windows, where one can get a fair idea of the latest features in mechanical and other toys for the pleasure and education of the little tots. Prices this season are very much less.

The snowstorm did not catch us napping. Our Rubber Stock is complete in all sizes, in every style, at attractive prices.

"How is Business? Is it Improving Any?"

People appear to think conditions are worse than they really are, and of course the more talk there is along this line of thought, the more pessimistic will the pessimists become.

Now, we are going to take you into our confidence, and tell you just how things are working out, and how they are being worked out in this store for the immediate advantage of our customers, and for the ultimate advantage of the store.

Last year we had quite a satisfactory year. The turnover was good; our sales exceeded those of any previous year by a very considerable amount, and we had many reasons for feeling well satisfied with the year's operations. But the profits of last year have been distributed among our customers in reduced prices this year, and our customer's appreciation has been expressed in increased quantity of merchandise sold this year. Coupled with this, we are this year working on the smallest margin possible, without any intention of making more than operating expenses, and we intend to continue this policy until the price of grain and other farm products comes back to a profitable basis.

Owning our entire premises, and thus having no rent to pay; keeping our overhead charges percentage down by maintaining the volume of sales; dealing on a cash basis, both buying and selling, and making no provision for dividends on our investment until conditions right themselves—we are able to quote prices which satisfy; and we are able to answer, heartily, BUSINESS IS IMPROVING, thank you.

Last year's wheat did not mill well. This is explained in that the wheat of last year ripened in about three days in the extreme heat, and because of the condition in the grain thus produced, it was almost impossible to make good flour, and the Western Canada Mills, making Purity Flour, was no exception, and two batches of Purity Flour gave our customers some trouble. We shipped out the balance of undesirable or poor flour from these two batches, and we have stock now of this year's wheat, which is of excellent quality, and every sack is guaranteed.

Those who have used Purity know what to expect of Purity Flour under usual circumstances, and those who have not used Purity should try it as it is this year. More Bread, Better Bread, and a Bigger Loaf.

We believe Purity Flour is the best flour

LATEST NEWS

At a meeting held in Cardston on Saturday, the Mormons decided to divide the Alberta stake, and create a new stake in the north, with bridge as the headquarters. Eight hundred people attended the meeting.

The Kipp U.F.A. local, at a meeting held recently, decided to offer the contractors a substantial bonus if they can rush irrigation work so that they can secure water for their farms in the fall of 1922.

The city of Lethbridge has arranged with the department of the interior for an increased allowance of water from the Old Man River, so that it can be safeguarded in the event of an increase in population from now on.

The Rev. James Pate, of Calgary, has been mentioned as the possible new minister for the United Church of Taber. The board is discussing the question of sending out a call to Mr. Pate.

The farm house of Dan Ostlund, northeast of the village of New Dayton, Alberta, was destroyed by fire several days ago. The loss is estimated at \$5,000, \$2,000 of which is covered by insurance.

Mr. Thomas Kinnaird of Medicine Hat, has charged Chief of Police Taylor and Detective Ritchie with irregularities in connection with a police court case. Kinnaird told the town council that he had just been informed he had been convicted and fined four months ago on a charge of having liquor in his possession.

That the deep waterway project would mean more to the people of the United States than the Panama canal, was the assertion of Congressman Jeffreys of Nebraska, when he spoke at the banquet held in honor of the delegates to the deep waterways convention at Hamilton Ont., on Tuesday.

How at least \$5,000,000 a year could be saved to the shippers and railway companies is the object to be demonstrated by a thirty-day campaign which opened Tuesday under the direction of the railway association of Canada, co-operating with the United States railways.

Ralph Primrose, who was rescued early Saturday from the flood waters at Britannia Beach, died in Vancouver on Tuesday night of double pneumonia. This makes a total of thirty-six deaths as a result of the flood.

James McIntosh, formerly of Glace Bay, N.S., a veteran of the great war, is to start from St. John on Thursday with the intention of travelling around the dry portions of the world on foot. He expects to finish the jaunt in five years.

If the Streetville, Ont., circuit has anything to do with it, women will not be admitted to the Methodist ministry. The question was voted down by a seven to one majority at the quarterly board meeting on Tuesday.

A decided stand in favor of the open shop was taken at the semi-annual meeting of the executive of the book committee of the Methodist church in Canada, and a resolution was adopted endorsing the stand taken by Rev. S. P. Pallas, book steward of the church, with regard to the printers' strike.

That the effort of the federal and provincial governments on the housing scheme had not been sufficient to satisfy the housing needs of the city in one year was the statement made by W. S. B. Armstrong, secretary of the town planning conference, in session at Toronto on Tuesday.

Two deaths from automobile accidents were reported in Toronto on Tuesday. Stanley Showers was knocked off his bicycle and fatally injured and sixteen-year-old James Halliday was also fatally injured when he was knocked down by an automobile.

Eight separate appeals to different classes of Ontario's population are proposed by the special provincial government committee. The employment as the means of solving the labor situation.

A passenger transportation war at St. John, N.B., entered a new phase on Wednesday, when a summons was issued to all directors of the Union Bus company to appear in court to show cause why an injunction should not be issued to restrain them from operating in the city. The street railway company had asked for the injunction.

Amalgamation negotiations between representatives of leading returned soldier organizations will be reopened in Winnipeg in December, according to an announcement made by Dominion command officials of the G.W.V. A. on Wednesday.

At a convention of Quebec farmers held at Montreal on Tuesday, it was decided to run twenty-five candidates in the coming federal elections as independents. Three hundred farmers attended the meeting.

Because his wife had married another man, alleging that she believed her real husband had been killed in action in the great war, Andrew Wood, hotel proprietor of Richibucto, N.B., was granted an absolute divorce at Fredericton, N.B., on Tuesday.

It is expected that a report from the board of arbitration dealing with the wages dispute between the Canadian National railways and the Canadian Brotherhood of Railway Employees will be in the hands of the minister of labor this week.

Harry Lewis, ex-jockey, who claimed to have won three Queen's plates for Joseph Seagram of Toronto, and to have ridden in the Derby of 1890 for Lord Rosborough, died at Port Arthur on Wednesday at the age of 56. He was born in Glasgow, Scotland.

BIBLE STORY OF THE FLOOD

Gigantic Tidal Wave, Twenty-five Miles High, Swept the Earth—Moon or Star Comet Probable Cause of the Inundation—Every Country in the World Has Stories of the Great Deluge, Handed Down Through the Ages by Word of Mouth.

The Bible says that many thousands of years ago there was a great flood—the so-called Noahian deluge. No one thought of questioning the truth of this story, until in comparatively recent times, when many who thought themselves very wise, arose to ridicule it along with other strange events related in the Bible. In recent years, however, science has thrown its inexorable light upon many of these stories and proved them to be actual facts. Thus it is with the story of the flood, the truth of which at least in its general lines—is so well established that no one but one unacquainted with modern science can doubt it. What, however, was its cause? Is it still a mystery. Here is a novel attempt to solve it. It is by H. Gernsback, editor of Science and Invention.

FOUR PROOFS OF FLOOD
In the first place, with the exception of some African tribes, there are flood stories in every country of the world, whether European, American, Asiatic or Australian. All of these people or races have some tale which was handed down by word of mouth that such a great deluge occurred some thousands of years ago. And there are many geological reasons which teach that a great flood actually did occur. The following proofs are taken from Prof. G. Fredrick Wright's article of the "Geological Confirmation of the Noahian Deluge."

1. "The filling of the numerous oysteriferous fissures in Western Europe with an indiscriminate mixture of the separate bones of widely diverse species of animals, mingled with angular fragments of rock and with earth without stratification, and containing occasional stone implements made by the hand of man. These could not have been filled gradually, because there are no entire skeletons of animals. But they were evidently filled by the indiscriminate action of a water wave of translation sweeping everything before it."

2. "The enormous accumulations of the bones of hippopotami in the cave of San Ciro, near Palermo, on the island of Sicily, where whole herds of this animal, which now lives only in Southern Africa, evidently sought refuge from rising waters in an extensive cave at the base of the rugged cliffs of Monte Grifone."

3. "The existence of Arctic seal in Lake Baikal (Russia) 2000 miles from the ocean and 1,500 feet above it."

4. "The historical Chinese tradition of the existence of such a vast body of water in the same region, known as the Han Hai."

SHELLS ON MOUNTAIN TOPS

However, Prof. Wright thinks that the flood was due to the glacial period, which accumulated a tremendous weight of ice on the northern hemisphere, particularly in America and Europe during that time. Prof. Wright reasons that due to the enormous amount of water deposited on these continents about 250 feet of water was thus subducted from the oceans, which when released later on, by melting, produced the flood over several of the continents.

While the explanation is a good one, it does not satisfy, for the reason that the melting glaciers could only have released the waters very gradually, and that if a flood occurred in this manner, it would have taken hundreds of years to produce deluge effects. Thus the rise of the waters over the continents, if it did happen would have been almost imperceptibly slow.

If, Hensback recently advanced a more plausible reason how the historical flood might have occurred. "That the flood was caused by the oceans and not by rain," he writes, "can be proved even from the Biblical accounts, where the inundation is represented to have been occasioned, not by rain, but by the breaking up of the foundations of the great deep."

Now if Noah had been, as presumably he was, a wise man, he no doubt would have been able to foresee what was coming, just as an astronomer can foretell the return of a comet years in advance. The flood is commonly supposed to have occurred in the year 2348 B.C. If we create a man with ingenuity enough to build the Ark, in other words, a vessel 500 feet long and fifty feet deep, as mentioned in the Bible, a vessel comparing very favorably with a modern ocean passenger steamer, that man must have had a rather remarkable intelligence. He was astronomically inclined, and probably could foretell the time when the encounter of the two bodies, viz., the earth and the strange wanderer, would occur. This, of course, would give him time enough to build his ark, and therefore escape the ensuing cataclysm.

The illustration gives a good idea of what would happen if the earth and the other celestial body were at their nearest approach, say 10,000 miles. It should be remembered that such an encounter as this could not be of long duration. The earth moves very rapidly on its orbit, namely at the rate of about 1,600,000 miles per day. The other body would move at approximately similar speed. The havoc caused by the mutual gravitational attraction would be colossal, as well as swift.

WAVES 25 MILES HIGH
As the two bodies approach, the ocean waters of the earth, being the most plastic substance, the almost rigid earth, would be drawn "sky high," all depending upon the distance which separated the two heavenly bodies.

That the ocean waters would be lifted up in gigantic tidal waves of anywhere from 10 to 25 miles high is a reasonable surmise. The lifting up of these waters would of course be swift, and would not necessarily cause immediate havoc, then; but the minute the two bodies separate, the

not so much by the rain, which fell as by the breaking up of all the foundations of the great deep." In plain English, this can have but one meaning, viz., the waters of the ocean. "That these waters were actually ocean waters can best be proved by the fact that fossil sea shells have been found upon the summits of our highest mountains in all parts of the world with the exception of some African mountains."

Mr. Gernsback's explanation of the flood is very simple, and it might readily have occurred as follows: "If some celestial body in its wanderings through the heavens passed sufficiently close to the earth; that is, within 10,000 or 12,000 miles, there is no question of a doubt that such an encounter would have caused havoc on earth. We are not concerned here with what that body was. It might have been our own moon or any of the other planets, or even an extraordinary large comet, of a bulk as big as the earth, or even as small or smaller than the moon, passing sufficiently close to the earth, say 2,000 miles. The mutual gravitational influences would then raise tremendous tidal waves, not only upon the earth, but upon the other heavenly body as well, providing there was water on it."

Now if Noah had been, as presumably he was, a wise man, he no doubt would have been able to foresee what was coming, just as an astronomer can foretell the return of a comet years in advance. The flood is commonly supposed to have occurred in the year 2348 B.C. If we create a man with ingenuity enough to build the Ark, in other words, a vessel 500 feet long and fifty feet deep, as mentioned in the Bible, a vessel comparing very favorably with a modern ocean passenger steamer, that man must have had a rather remarkable intelligence. waters naturally would recede with a rush, and would inundate the continents considerably over the tops of the highest mountains. Consider that the waters of the earth cover five-eighths of the entire surface. If, therefore, this theory be correct, the receding waters would rush over almost every continent of the globe. Nor would this Titanic disturbance be momentary. The gigantic waves created would not be still around the earth for many days to come. It might even take months for some continents to be come depleted of the waters; undoubtedly new oceans would be created and old ones turned permanently into land. Witness Dr. Wright's remarks as to the history of the Chinese ocean known as Han Hai.

How long such a disturbance might last until the oceans finally came to rest again is impossible to know now, but it cannot be doubted that the time element would be rather long. It is well known that a cloudburst sometimes deluges a section of the country for some days before the waters finally disappear through infiltration, into the ground or are carried away by rivers. Such a local inundation probably never exceeds an average of 10 to 15 feet deep.

If, then, it takes days for the waters to recede from such a purely local affair, how long would it take the waters to finally disappear if an ocean wave anywhere from 10 to 25 miles in depth swept over the lands?

Notice is hereby given that certain lands in the Municipal District of Raven, No. 342, will be offered for sale for arrears of taxes and costs, on the 22nd day of November, 1921, at the hour of 2 o'clock in the afternoon, at Stauffer Post Office.

A full list of the lands offered for sale will be found in the Red Deer News, published at Red Deer, Alberta, under date of September 28th, 1921.

Dated at Stauffer, in the Province of Alberta, this 26th day of September, 1921.

J. E. H. McCABE, Secretary-Treasurer, Stauffer, Alta.

W. T. LEE, Secretary-Treasurer.

COAL!

DRUMHELLER NUT
A splendid fuel for the range

Merry Christmas to You

Our busy season has started, and it is for this reason we are advancing to you the Compliments of the Season, as later on we will be in the midst of the busiest Christmas season we have ever had.

With the complete and up-to-date equipment in our Studio we are looking forward to this year's Christmas work with pleasure---no matter how great it will be.

We are going to ask our customers to co-operate with us, to do so, you will take advantage of an early sitting.

There is nothing in the photographic business that we cannot do, and do it with the artistic skill of any city studio at more reasonable prices.

If you have not made arrangements for your Christmas presents, don't worry any more, a few minutes for a sitting, a dozen photos, and all is settled. Nothing easier and nothing more appreciated by your friends.

A new assortment of Framed Pictures just arrived. These will make beautiful presents for the Newly-weds.

POSSIBILITY OF POISON GAS

KILLING BY WHOLESALE

Are civilized nations at war prepared to adopt weapons that will enable them to wipe out an army of a million men in a few hours or to annihilate whole cities? Our Chemical Warfare Service assures us that the United States now possesses the means of doing this very thing. What are we going to do about it? The editor of The Scientific American expresses his belief that the world at large is not ready to go the Germans several points better in disregard of the humanitarian laws of war. All poison-gas warfare should be declared unlawful, he thinks, by international agreements of some sort. Unless something of this kind is done, the next war, he believes, will make the last one "miserable by comparison," and will wipe out mankind at a rate which will turn many a flourishing capital into a deserted village. The development of highly destructive weapons, he points out, has never yet prevented nations from making war, and if these horrors are to be averted, either war itself must be made impossible, or the nations must get together on this point, if on no other. He writes:

"Mr. Chairman, the Chemical Warfare Service has discovered a liquid approximately three drops of which, when applied to any part of the skin, will cause a man's death. Much smaller amounts than this, or even vapors from the liquid, cause very severe, slow-healing burns."

If the reader applies to the government printing office, at Washington, he can get therefrom a copy of the "Hearings of the Third Session of the House Naval Affairs Committee," and he will find there that the words above quoted form part of a statement by Dr. Braden, chief of research of the Chemical Warfare Service. Mr. Braden goes on to remind the committee that the world-war showed it to be possible for an airplane to fly within a hundred feet of enemy troops and machine-guns them with impunity; and he goes on to state that, if instead of carrying machine guns, they carried tanks of this liquid (Lewisite) for discharge from nozzles similar to the ordinary street sprinkler, it would fall like rain, killing everything in its path.

Then he becomes more specific and tells us that one plane, carrying two tons of the liquid, could cover a stretch of country 300 miles wide by seven miles long in one trip, and that it could spray down enough of the liquid gas to kill every man in that area simply by the action of the spray upon the skin. Then, a little later, he becomes even more specific and tells us that, during the Western Front of the entire First American Army of a million and a quarter men, occupied an area of 200 miles long and 20 miles wide. If, he goes on to say, Germany had possessed 4,000 tons of this material, and, say, 350 planes properly equipped for spraying, our entire First Army would have been annihilated in twelve hours.

"Now, 4,000 tons seems like a big lot of gas; but we already possess at the Aberdeen Proving Ground a huge poison-gas factory (Edgewood) which is capable, at the armistice, of producing 200 tons of gas per day, and it would be a simple matter by enlargement and duplication to put this country in a position where it could produce several thousand tons of gas for the supply of our armies and keep the supply going indefinitely. Yes, the future war will be so horrible as to make the late war restful by comparison. Short as it will inevitably be, it will last long enough to wipe out mankind at a rate which will turn many a flourishing capital into a deserted village, and many a fair campaign into a Sahara of white desolation—for this gas, remember, is as fatal to vegetation as to human life."

"All this talk, however, about the poison-gas war of the future is based on what we dare to believe is an utterly unwarranted assumption, namely, that the devil's own disregard of the humanitarian laws of war, initiated by the Germans at Ypres, is to be accepted and practiced by the world at large. It is in the forthcoming 'Association of Nations,' or the meetings on disarmament of the League, or whatever, it is accepted that poison-gas will be given in the face of the protest of that undoubtedly large majority of men who believe that honor, chivalry, and human kindness are not quite dead in our midst, and that the monstrous horror of the first gas attack at Ypres should not be the yardstick by which we measure our future military conduct."

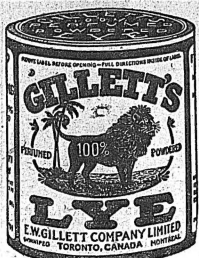

"It has been urged that the free use of gas will make future wars so frightful that no nation will dare to provoke a conflict. The answer to that assumption is that, in the past, the development of new weapons of great destructive power has never prevented a nation from rushing into war."

AN OLD BANK ACCOUNT

Former U.S. Senator Made Deposit Over 60 Years Ago

Along about 1950 or 1960, when Chancery M. Dewey decides to retire from the directorate of the New York Central Railroad and pass his declining years in rest and quiet at Briarcliffe Manor, he will have a nice little nest egg laid aside for his old age. "The first \$100 I ever made," he said, "was deposited in the Peckskill Savings Bank at interest. That was more than sixty years ago, the year before the civil war started. It has been there ever since, because I never had the heart to draw it out, although sometimes I needed it badly. I always thought something might happen."

"Then I forgot all about it," the former Senator continued. "The other day I was in Peckskill and dropped in at the bank. I asked them if I had any money there, and an official told me that my old account of \$100 was still on the books and had multiplied to \$800. He said it was their 'savings account' because of its venerableness. Mr. Dewey added that he had another deposit of \$250 there, and he deposited in the Winchester County Bank fifty years ago. This did not draw interest. It is still there, and still \$250. He is going to leave both accounts where they are, he said."

PRESS THINKS ULSTER LIKELY TO BE FACTOR

Lloyd George May Have to Postpone Contemplated Trip to United States

London, November 2.—Negotiations relative to peace in Ireland have progressed to a point which makes necessary the presence in London of Sir James Craig, the premier of Ulster, it was declared here today. Political correspondents of London newspapers today centered their attention upon the Ulster question and speculated whether Sir James would join in the conversations going on here.

"It would appear that the day when Ulster must be associated with the Sinn Féin in the negotiations is near at hand," declared the parliamentary correspondent of the London Times, "but the manner and time of Sir James Craig's coming are among the obscurities of the situation."

CRAIG MAY BE INVITED
The Daily Mail asserted there would be little surprise if Sir James Craig should be invited soon to the Irish conference and other newspapers treated such an event as a possibility. Public dispatches to the Daily Mail stated that many people there were more sanguine than might be expected over the Ulster situation. It said prominent persons in Dublin had been in Belfast recently and had sounded various circles there with optimistic results, but the dispatch added, the root of this optimism seemed to be principally in the belief that the financial position of Belfast was so bad that a junction with the rest of Ireland might be forced by the stringency of money.

PESSIMISTIC RUMORS
There were pessimistic rumors current here last night concerning the Irish negotiations, but there were no developments, so far as known, to justify the opinion that the situation was lessening the chance of Mr. Lloyd George sailing on the Aquitania, which leaves on Saturday for the United States.

Some papers were positive in their statement that Mr. Lloyd George had abandoned all idea of starting Saturday, although he was still determined to go as soon as possible.

New Westminster commenced in earnest on Wednesday its siege against the water famine caused by the washing out of the two water mains from Georgetown. Householders have failed to heed the appeals for conservation and as a result the city may become waterless in a few days.

A general referendum among service men and women is to be held to decide what shall be done with the \$1,800,000 held in trust as Canada's contributions from the surplus profits of canteens from the British armies, it is announced. It is a statute most authoritatively by Sir Henry Drayton, minister of finance.

The first hanging in the history of the northwest territories was scheduled to take place at Fort Smith 900 miles north of Edmonton, on Tuesday. Albert Lebeaux, Slavey Indian, who murdered his wife and child, was hanged by his crime upon the gallows unless some unforeseen circumstances arose which delayed the carrying out of the death sentence.

A 14-year-old boy picked up by the Port Arthur police on Wednesday claimed that he escaped from the Children's Shelter at Fort William after being handcuffed to a door.

ABDICATION OF FORMER EMPEROR KARL DEMANDED

What Is Said To Be Ultimatum Delivered to Hungarian Government

Budapest, Oct. 31.—What is demanded by the ultimatum delivered Sunday to the Hungarian government by representatives of Great Britain and France, and the terms of the ultimatum, demanding that Charles be handed over to the commander-in-chief of the Italian army, and the immediate proclamation of his deposition as king.

About the same time, representatives of the Little Entente notified the foreign ministry that if the ultimatum was not accepted, Hungary alone would be responsible for the inevitable and serious consequences.

Refuses to Sign
Budapest, Oct. 31.—Former Emperor Charles has again refused to sign his abdication. He issued plenipotentiaries who went to Hungary where Charles was interned, have reported to Admiral Horthy, the regent, who has called a meeting of the cabinet.

In Serious Straits
Bern, October 31.—A bulletin visited Hertenstein, Saturday, for the purpose of securing an attachment against property of former King Charles, one of 50,000 francs in favor of the Swiss "Liberation Committee," one of the planes in which Charles made his recent flight into Hungary. It is said that the "council of Charles" during the last four months maintained itself mainly through the sale of the royal jewelry.

WHAT PREMIER MEIGHEN OPPOSES
"It will not take me long to tell you," said Mr. Meighen, "how I know all 'my life. Where I stand on this issue is in 1908, in 1911, and in 1911 I was against it. I was against the plan of Mr. Meighen, Wood and Creighton, 'wholly, immovably against it. I believe it is a mistake. I believe it is unfair. I believe it is wrong. I have not the slightest doubt if it is put into effect it will bring disaster to this country. I believe it is a disaster to the whole country. I do not mean 'words are plain as steel. No man 'what the consequences, I take my stand and pledge myself once 'again to resist the programme of the 'Wood-Creighton party as long as there 'trough in me to resist anything, 'and I resist it as strongly as I can. 'to do so should mean political defeat. 'it is to do so should mean political defeat. 'I am against the programme of the 'eral platform—against it from the 'first line to the last. It is not only 'a disaster to the whole country, but 'believe that those who adopted that 'platform are believing in their own 'selves. That platform was 'conceived by men who knew it was 'a disaster to the whole country, and 'who erected it only for the sake of 'enriching a large section of the 'voice of the country who on the said land, 'tended afterwards to betray. If 'any one here thinks the language 'said just to resist anything, 'their platform and then read the 'speeches that the makers of the plat- 'form have made, they will find it 'week in the province of Quebec."

"CLASS" IN ALBERTA
Premier Greenfield's address before the Rotary Club last week was a sincere and eloquent plea for better citizenship, for devotion to high ideals in service to the state.

The people of Alberta do not doubt that he is guided by such principles. They look to him to give good government to the province. They believe that he has the ability as well as the desire, to govern this province well.

In his public addresses, Mr. Greenfield reiterates that he does not intend to exercise the power that has been placed in his hands, for the special benefit of any class, farmer or any other. This is to be so, the public learns not only with interest, but with relief.

The premier is inclined to blame "printer's ink" for disseminating talk of economic class consciousness. That doctrine was implanted in the minds of the people of Alberta by President H. W. Wood, and it has been frequently exploited by President Wood and his followers.

If the class conscious idea does not now exist in the present government of Alberta, the premier is glad to hear of its expulsion. If it is merely a catchy cry to attract support to the Farmer party and then to be abandoned after election day, well and good, provided always that the pre-election use of it brings to the government men as able, as sincere, as free from fanaticism, as Premier Greenfield has shown himself thus far to be.

NOTICE

To all whom it may concern:

Please take notice that H. Milton Martin, Commissioner appointed under authority vested in the Lieutenant-Governor-in-Council by Chapter 22, Statutes of Alberta, 1919, and Amendments thereto, will hold a Commissioner's Sitting at the City Hall, Red Deer, at the said date and hour, to consider the application of the Municipal District of Pine Lake, No. 339, made to the said Commissioner under the said Act and among other matters covered by the application and the cancellation of the plans thereof.

SHERIFF'S SALE

Province of Alberta to Wit:

By virtue of a Writ of Venditioni Exponas issued out of the Supreme Court of Alberta, Judicial District of Red Deer, at the suit of The Canadian Credit Men's Trust Association, Plaintiff, and Thomas H. Clark, Defendant, and to be directed against the lands of Thomas H. Clark, I have seized and taken into execution the following lands, namely:

Lot 36, Q. of Sec. 1, Township 36, Range 1, West of the 6th M. Province of Alberta. I am advised that the soil of the said land is good and that the said land could all be put under cultivation; that there is on the said land a five-roomed log house valued at \$1,000.00; a small creek runs through the South Western corner of the land. The property is five miles from Church and School.

Which I shall expose for sale on Saturday, the 12th day of November, at 2:30 o'clock in the afternoon, at the Court House, Red Deer.

JOHN A. MCPHERSON, Sheriff.
